The following information was discussed:

- **Informational presentation by the New York State Department of Transportation on the replacement of three bridges on the Bronx River Parkway with Safety and Mobility Improvements between East 177th Street and Bronx Park**

The New York State Department of Transportation informed us that they are in the design phase of a capital project to replace three bridge structures carrying the Bronx River Parkway. These bridge structures are located between East 177th Street and the Bronx Zoo/Bronx Park and span across railroad facilities and East Tremont Avenue. This project will also replace the ramp connection between the southbound Bronx River Parkway and East 177th Street. In addition, a shared use path for pedestrians and bicyclists is proposed to be constructed on the east side of the three new structures. 1st phase of the project is design bid-build project under X110.28 and construction is anticipated to commence in Winter of 2023. 2nd phase of the project is design-bid project under X110.29 and construction is anticipated to commence in Winter of 2024. The committee is in support of the scope and benefits of this project.
