Bronx Community Board 8, like all the community boards within NYC, has an important advisory role in dealing with land use and zoning matters, the City budget, municipal service delivery and many other matters relating to their communities' welfare. Some of the major issues that Board 8 has addressed in recent years include: the creation of a comprehensive vision for the community through a 197-A Plan; the rezoning of various areas to prevent development that is out of character with a local area; amendments to the Greenbelt or Special Natural Area District provisions; and the economic revitalization of West 230th Street and Broadway.

Bronx Community Board 8 usually meets the second Tuesday of every month (no meetings during the summer) in varying locations. Check the calendar for more information.

Health & Safety Tips During Extreme Heat

New York City Emergency Management Department and the New York City Department of Health and Mental Hygiene advise New Yorkers to take precautions to beat the heat.

- Those most vulnerable to heat stress include adults aged 60 and older, and people with health conditions, including heart disease, diabetes, mental health conditions, or people with cognitive impairment. Check on people who are at-risk and help them find a cool place to stay during heat events.
- Go to an air-conditioned location, even if for a few hours.
- Stay out of the sun and avoid extreme temperature changes.
- Avoid strenuous activity, especially during the sun's peak hours: 11:00 AM to 4:00 PM. If you must do strenuous activity, do it during the coolest part of the day, which is usually in the morning between 4:00 AM and 7:00 AM.
- Remember: drink water, rest, and locate shade if you are working outdoors or if your work is strenuous. Drink water every 15 minutes even if not thirsty (avoid beverages containing alcohol or caffeine), rest in the shade, and watch out for others on outdoor teams. Employers are required to provide water, rest, and shade when work is being done during extreme heat.
- Eat small, frequent meals.
- Wear lightweight, light-colored clothing.
- Participate in activities to keep cool, such as going to the movies, visiting museums, walking in an air-conditioned mall, or swimming at a pool or beach.
- Make sure doors and windows have tight-fitting screens and, in apartments where children live, window guards. Air conditioners in buildings more than six stories must be installed with brackets so they are secured and cannot fall on someone below.
- Never leave a child or pets in the vehicle, even for a few minutes.
