Bronx Community Board 8 Map

Bronx Community Board 8, like all the community Boards within NYC, has an important advisory role in dealing with land use and zoning matters, the City budget, municipal service delivery and many other matters relating to their communities' welfare. Some of the major issues that Board 8 has addressed in recent years include: the creation of a comprehensive vision for the community through a 197-A Plan; the rezoning of various areas to prevent development that is out of character with a local area; amendments to the Greenbelt or Special Natural Area District provisions; and the economic revitalization of West 230th Street and Broadway.

Bronx Community Board 8 usually meets the second Tuesday of every month (no meetings during the summer) in varying locations. Check the calendar for more information.

MTA Painting & Steel Repairs W 225th Street to W 242nd Street

MTA Painting & Steel Repairs 225th St. to 242nd St.

The MTA Painting and Steel Repairs of 225th Street to 242nd Street Project includes structural steel repairs, painting, and concrete repairs which carry the MTA 1 Line tracks from Marble Hill Station to Van Cortlandt Park Station above Broadway in the Bronx to a state of good repair.

ABOUT THE PROJECT

225th Street to 242nd Street in the Borough of the Bronx is a 1.20-mile-long elevated steel structure, which carries the MTA 1 Line tracks above Broadway in the section of Kingsbridge, Bronx. The train line is a vital artery carrying riders to and from Manhattan to the Bronx. The project focuses on structural repairs and painting on the Broadway - 7th Ave line and bringing the structures carrying the 1 line tracks to a state of good repair.

The project will include abrasive blasting, painting, and structural repairs to sections of the elevated structure, and removing and repairing concrete column bases. The repairs and painting will proceed in phases along the viaduct, with sequential work zones and staging areas being installed and released as the work progresses. Air and noise monitoring equipment will be in place during abrasive blasting and painting operations.

PROJECT ELEMENTS

Work areas will be established in phases and will proceed from south to north, in approximately 1000-foot sections, along the viaduct.

Containment units will be installed along the viaduct for the protection of the public. Noise mitigation strategies will be in use in the abrasive blasting areas.

Croswalks, and access to businesses and properties adjacent to the viaduct, will be maintained at all times.

Construction signage and traffic control devices will be stationed around work zones as traffic patterns may alternate to accommodate equipment movement and construction activities
